Applicant's typed or clearly printed name

**The application shall contain at a minimum all of the following, unless otherwise authorized by the Township Board of Supervisors:**

1. The legal description of the premises for which the permit is sought.
2. Detailed description of any treatment or processing to be done on the permit premises or other related locations within the Township.
3. A detailed statement of measures to be taken to control noise, vibration, dust, odors, erosion, emissions, discharges, or accidental release or other adverse environmental impacts.
6. A description of the material to be transported by the proposed pipeline and a MSDS for the material.

**Unless otherwise authorized by the Township Board of Supervisors, the applicant shall also submit:**

7. A copy of any permits, approvals, licenses, certifications or other such approvals required by law or regulation for the facilities, processes, equipment, structures or activities regulated by this Ordinance, including but not limited to the Forward Township Excavation and Land Disturbance permit and proof of payment of all applicable fees, any Excess Weight agreements and payments of necessary bonds for any Township roads to be used for this project, copies of all necessary street crossing or street opening permits for Township road and an approved Allegheny County Soil Erosion and Sedimentation Control Plan.
8. A site plan showing the exact location and topographical survey showing the exact elevation of any pipeline, processing facility, processing equipment or other activity for which a permit is sought. Upon completion, as-built drawings must be provided to the Township in digital and paper format.
9. The exact location and elevation of any oil or gas well or other structure that will connect to such pipeline, process or equipment
10. A map showing the location of all occupied dwellings or structures, public roads, streets, schools, hospitals, parks or other places frequented by the public within 1320 feet of the proposed pipeline and its related system.
11. The proposed access and at least one other access from a different direction to the proposed pipeline or pipeline system.
12. Proposed buffers and setbacks from any dwellings or structures not related to the proposed pipeline or pipeline system or activity.
13. A map and description of the entire pipeline system that is part of or connected to, or will use or rely on the proposed pipeline.

14. A detailed site reclamation plan for the project.

**The applicant must additionally submit a description of any public facilities or services required for the installation and maintenance of a regulated use, such as roads or fire protection, whether such services exist, and if not, how applicant proposes that these services be financed and provided.**

**Once submitted, the application will be forwarded to the Planning Commission for review and recommendation. Following a review and any recommendations of the Planning Commission, the Township Board of Supervisors, at their sole discretion, may request a public hearing.**

**If approved, the Permittee shall file with the Township Secretary a performance guarantee and a copy of a policy of general liability insurance as required pursuant to Ordinance No. 13-3 of 2013.**
